Elecnor will participate in developing the Azulão Complex in Brazil, a project involving an investment of EUR 390 million

- ▶ The project, awarded to Elecnor, includes the construction of a Gas Processing Unit, a 950 MWe Power Plant and its related substation and evacuation lines.
- ▶ Nearly 2,800 professionals will be hired to execute the project, which will have a 36-month development period.

Elecnor has been awarded the development of the Azulão Complex for Eneva, a leading integrated energy company in Brazil. The project, which is located in Silves, in the Brazilian state of Amazonas, will involve an investment of approximately EUR 390 million. It includes the execution of a Gas Processing Unit, a Power Plant and its related substation and transmission line.

950 MWe
at the power plant

The Azulão project consists of the design, construction and set-up of a power plant with a combined-cycle gross nominal capacity of 590 MW and a simple-cycle gross nominal capacity of 360 MW. Specifically, the power plant consists of two gas turbine generators (GTG), a heat recovery steam generator (HRSG) and a steam turbine generator (STG).

36-month
execution period

The complex includes a natural gas processing unit (GPU) to process the raw gas, which will produce an average of 4.3 million normal cubic metres of gas a day.

Finally, the project includes a 500 kV substation, the extension of the existing substation switchyard at Silves (500 kV) and two 13.8 kV distribution lines.

2,800
employees hired

About Elecnor in Brazil

Brazil is the second most important market for the Elecnor Group, after Spain. This situation is the result of a 35-year solid track record in the country, which is evident in achievements such as wind complexes or the more than 8,000 kilometres of power transmission lines.

These days, Elecnor is developing its extensive skills in Brazil as an EPC company in several infrastructure activities and as a promoter and investor in renewable energy, power infrastructures and the environment. Elecnor do Brasil is committed to the overall development of the country, which it wants to continue to help, as it has done since 1979, backed by rigour, solvency and reliability, intrinsic values in Elecnor's corporate philosophy.

About the Elecnor Group

The Elecnor Group is a Spanish enterprise doing business in over 50 countries that stands out for its profitability, recurring revenue, and moderate risk. It is an international leader in building, managing, and operating renewable energy concessions, sustainable infrastructure projects, and essential services for energy transition and city digitalisation. It is a globe-spanning company driven by a people-based business model dedicated to creating shared value and sustainability. The Group's activities are organised along three strategic tracks: concessions and self-operated projects, essential services, and sustainability projects. Its strong international outlook has led it to a continuous expansion process which has opened the doors to new markets around the world, especially in Europe, North America, Central America, South America, Africa, Australia and the Middle East. Elecnor, which is listed on the Continuous Market, has a highly qualified team of professionals and a total workforce of 22,563 employees. In 2023, the company reported revenues of EUR 3,792 million and a consolidated net profit from ongoing operations of EUR 110.1 million.
