Elecnor begins construction of a 320 MW Wind Farm in Mexico

- ▶ The construction of this new farm is expected to create over 2,000 direct and indirect jobs.
- ▶ The project will supply clean energy equivalent to the consumption of more than 84,000 homes in California, and will help to reduce CO₂ emissions by over 200,000 tonnes a year.

Elecnor has recently been awarded a contract in Mexico for the engineering, supply and construction of the Cimarrón wind farm with a capacity of nearly 320 MW, located in La Rumorosa and the municipality of Tecate, Baja California.

320 MW
capacity

The project, currently under construction, is being promoted by Sempra Infraestructura, a leading energy infrastructure company in North America that operates over 1,500 MW of clean energy in Mexico. The Cimarrón wind farm has already signed a power purchase agreement for 20 years with Silicon Valley Power to supply long-term renewable energy to the town of Santa Clara, California.

64
wind turbines

The wind farm, which has 64 wind turbines built with Vestas technology, will be one of the largest wind power projects in the whole of Mexico. It will also have 70 km of roads, a 45 km medium-voltage network, a 30 km power line carrying 230 kV and a step-up substation.

CO₂
reduction
200,000 t/year

The project will supply clean energy equivalent to the consumption of more than 84,000 homes in California, and will help to reduce CO₂ emissions by over 200,000 tonnes a year. The construction of this new farm is expected to create over 2,000 direct and indirect jobs.

It is planned that the Cimarrón wind farm will begin to produce power at the end of 2025.

This wind farm will be the third that Elecnor has built in the country, thereby making it the leading company for this type of project.

About Ecnor Mexico

Ecnor began its activity in Mexico in 1992. During this time, it has continuously been building all kinds of infrastructures, including power transmission projects, installations, gas pipelines and renewable energy power plants. The award of this contract to construct the Cimarrón Wind Farm means it is one of the Ecnor Group's largest projects and it is further proof of the business sector's confidence in the company, making it a key player in the renewable energy sector in Mexico.

The Ecnor Group contributes mainly to the following SDGs:

3 GOOD HEALTH AND WELL-BEING

7 AFFORDABLE AND CLEAN ENERGY

8 DECENT WORK AND ECONOMIC GROWTH

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

13 CLIMATE ACTION

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

Ecnor Group

The Ecnor Group is a Spanish enterprise doing business in over 50 countries that stands out for its profitability, recurring revenue, and moderate risk. It is an international leader in building, managing, and operating renewable energy concessions, sustainable infrastructure projects, and essential services for energy transition and city digitalisation. It is a globe-spanning company driven by a people-based business model dedicated to creating shared value and sustainability. The Group's activities are organised along three strategic tracks: concessions and self-operated projects, essential services, and sustainability projects. Its strong international outlook has led it to a continuous expansion process which has opened the doors to new markets around the world, especially in Europe, North America, Central America, South America, Africa, Australia and the Middle East. Ecnor, which is listed on the Continuous Market, has a highly qualified team of professionals and a total workforce of 22,563 employees. In 2023, the company reported revenues of EUR 3,792 million and a consolidated net profit from ongoing operations of EUR 110.1 million.
